

# SALES DEVELOPMENT

## MODELS, METRICS, AND COMPENSATION RESEARCH

# INTRODUCTION

---

Hello! And welcome to the tenth round of biennial research focused on Sales Development.

Since 2007, we've been tracking the SDR (ADRs, BDRs, xDRs, etc.) role with a focus on how metrics and compensation change over time. For this round, **351 B2B companies** participated. We've organized the report into five sections:

1. Organizational Structure
2. Ramp & Retention
3. Metrics & Quota
4. Compensation & Tech
5. Leadership

We hope this report will provide guidance as you build out your strategy or think about changes to possibly bring you closer to alignment with industry standards.

If you have any questions, please reach out to us directly. We want to hear from you. You can email us at: [community@bridgegroupinc.com](mailto:community@bridgegroupinc.com).

**We help b2b tech companies build, scale, or optimize their proactive sales efforts. We think about impact in days and weeks because our clients can't wait quarters to see results.**

We're an SDR, AE, and AM consulting firm dedicated to understanding the *models*, *metrics*, and *motions* that deliver scalable growth.

### Breaking down the 2025 SDR report

<https://www.youtube.com/watch?v=0kavMnPTchM>

Our own Kyle Smith and Matt Bertuzzi walk through the full report to discuss the findings, changes since the last edition, and long-term trends over the past decade plus.

# COMPANIES THAT PARTICIPATED

# PARTICIPANTS

- 351 executives from a broad range of B2B companies
- 78% North America-based and 83% B2B SaaS
- \$47M median revenues
- \$50K median average selling price (ASP)

## Respondents by revenues

## Respondents by ASP

# TARGET BUYERS

We asked each respondent which functional area is their primary sales target.

# RESPONDENTS BY TARGET BUYER & ASP

|                             | <\$5K | \$5-25K | \$25-50K | \$50-100K | \$100K+ |
|-----------------------------|-------|---------|----------|-----------|---------|
| IT / Operations / COO       | 0.7%  | 2%      | 3%       | 4%        | 8%      |
| CISO / InfoSec              |       | 1%      | 2%       | 5%        | 6%      |
| Business Owner / CEO        | 1%    | 4%      | 3%       | 3%        | 2%      |
| HR / People                 |       | 3%      | 3%       | 4%        | 2%      |
| CFO / Finance / Legal       |       | 3%      | 3%       | 2%        | 3%      |
| Marketing                   | 0.4%  | 3%      | 1%       | 3%        | 3%      |
| Dev / Engineering / Product | 0.4%  | 1%      | 1%       | 2%        | 2%      |
| Sales                       |       | 1%      | 2%       | 2%        | 1%      |
| Other                       | 1%    | 3%      | 3%       | 2%        | 1%      |

Frequency heatmap

## PART 1

# ORGANIZATIONAL STRUCTURE

# WHERE SDR GROUPS REPORT

Since 2012, we've found the vast majority of SDR teams report to Sales.

This year the trend continues with 60% of groups sitting within the Sales organization.

It's worth mentioning that experience and interest trump all other factors in determining the reporting structure.

**60% of Sales Development groups report to Sales.**

# SDRs ALIGN TO AE TERRITORIES

The vast majority (82%) of Sales Development groups align SDRs to AE territories. This persists across revenues and ASP and has been increasing over time. It is worth noting that just 40% of Inbound-only teams align SDRs to AE territories.

# SDR-TO-AE RATIOS

The average ratio is 1 SDR to 2.4 Account Executives. This has been consistent since 2018.

Two things to note: One, smaller companies are much more likely to deploy more SDRs in support of their AEs. And two, this is the first year where “AI SDRs” have been noted in the data.

## Distribution of SDR-to-AE ratios

## Average AEs supported by 1 SDR by revenues

# SDR HEADCOUNT BY REVENUES

We asked for total, org-wide headcount and have shared the 25<sup>th</sup> and 75<sup>th</sup> percentiles of responses below.

# ACCELERATION TECHNOLOGIES

Of all the acceleration technologies we covered, the vast majority have crossed the chasm in the adoption lifecycle.

# ACCELERATION TECHNOLOGIES BY MOTION

|                                            | Inbound | Allbound | Outbound |
|--------------------------------------------|---------|----------|----------|
| LinkedIn Premium or Sales Navigator (paid) | 56%     | 88%      | 81%      |
| Sales engagement platform                  | 72%     | 84%      | 77%      |
| Contact data and account intelligence      | 56%     | 82%      | 74%      |
| Call recording and conversation analytics  | 89%     | 68%      | 66%      |
| Lead / account matching and routing        | 61%     | 65%      | 50%      |
| Dialers / parallel dialers                 | 39%     | 44%      | 41%      |
| Call coaching / salesfloor platform        | 33%     | 24%      | 28%      |
| Video creation, distribution, and tracking | 6%      | 14%      | 14%      |

## PART 2

# HIRING, RAMP, AND ATTRITION

# WHERE COMPANIES ARE HIRING NEXT

We asked respondents how they are hiring candidates “for current (or near-term) open positions.” Since 2022, there has been movement away from fully remote and toward partial or full RTO.

## Distribution of responses

## Change over time

# EXPERIENCE REQUIRED AT HIRE

Since 2010, we've seen a 50% fall in required experience. This year, average required experience rebounded slightly to 1.2 years.

Compared to 2022, 23% fewer companies require 0-1 years experience and 32% more require 1-2 years. Much of this reflects a more challenging employment market for SDR talent.

# EXPERIENCE REQUIRED AT HIRE 2022 VS. 2024

# RAMP TIME

Average ramp time sits at 3.0 months. This is the lowest reading since 2010.

Perhaps we are entering a new era—of AI-powered ramping to productivity. Or perhaps management expectations are tightening, which is bringing ramp-up period into sharp focus.

# TENURE

Tenure rebounded sharply in 2024—now sitting at 1.9 years. The layoffs of late 2022 and early 2023 (and the highly competitive AE job market of 2024) clearly extended average SDR tenure. At nearly two years, we note average tenure not seen since the early 2010s.

### Distribution of average tenure

### Average tenure over time

# CAREER PATH

The overwhelming majority (97%) of companies offer at least one form of SDR career path. More than half (58%) offer two or more. All three promotion paths are down from the all-time highs of 2022.

| SDR-TO-AE       | Into an AE role                     |
|-----------------|-------------------------------------|
| STEP-PROMOTIONS | Associate, Senior, Principal, etc.  |
| ACROSS TEAMS    | Inbound, Outbound, Enterprise, etc. |

% offering a given career path *over time*

# ATTRITION

The biggest shift from the post-COVID boom (H2-2020 to H2-2021) has been the halving of promotions and the rise and subsequent fall of voluntary quits.

| 2020        |     |
|-------------|-----|
| Involuntary | 15% |
| Voluntary   | 11% |
| Promotions  | 34% |

| 2022        |     |
|-------------|-----|
| Involuntary | 12% |
| Voluntary   | 16% |
| Promotions  | 21% |

| 2024        |     |
|-------------|-----|
| Involuntary | 13% |
| Voluntary   | 11% |
| Promotions  | 16% |

Median annual turnover sits at 40%. The 25<sup>th</sup> and 75<sup>th</sup> percentiles are 21% and 57%.

## PART 3

# METRICS AND QUOTA

# DAILY ACTIVITIES

## Distribution of average dials per day

## Median activities per day *by type*

|            |     |
|------------|-----|
| TOTAL      | 112 |
| PHONE      | 44  |
| EMAIL      | 41  |
| LINKEDIN   | 19  |
| TEXT/OTHER | 8   |

# QCs PER DAY

Another useful metric is the number of *Quality Conversations* (QCs) per rep per day. We define a QC as “a connect or response where at least one piece of qualifying or disqualifying information is learned.”

We find an average of 4.1 QCs per rep per day. This is the first rebound in daily QCs since we’ve been tracking this metric.

# DAILY QCs BY DOMINANT CHANNEL

We categorized groups as either *Email-centric*, *Phone-centric*, or *Neutral* based on their most dominant outreach channel. Responses indicate a 32% / 41% / 27% divide (email, neutral, phone).

By definition, phone-centric groups average higher dials per day. Interestingly, they also report 1.4X as many QCs.

# SALES DEVELOPMENT MODEL

Broadly, SDR groups fall into three categories. They include:

1. Introductory Meetings
2. Semi-Qualified Opportunities
3. Fully Qualified Opportunities

In our 2022 data, we noted a shift towards more qualified models. This year, companies are moving back down the qualification curve.

# QUALIFICATION LEVEL BY MODEL

|                     | <b>Right Profile</b><br>(firmographics,<br>tech, etc.) | <b>Pain/need is<br/>identified</b> | <b>Person has<br/>authority</b><br>(or access) | <b>Compelling<br/>reason</b> (to<br>buy/change) | <b>Money</b> (has it<br>or can get it) | <b>Timeframe is<br/>defined</b> |
|---------------------|--------------------------------------------------------|------------------------------------|------------------------------------------------|-------------------------------------------------|----------------------------------------|---------------------------------|
| <b>Introductory</b> | 68%                                                    | 42%                                | 25%                                            | 7%                                              | 1%                                     | 0%                              |
| <b>Semi-Qual</b>    | 88%                                                    | 95%                                | 78%                                            | 48%                                             | 5%                                     | 21%                             |
| <b>Fully Qual</b>   | 85%                                                    | 98%                                | 98%                                            | 93%                                             | 68%                                    | 65%                             |

- As ASP rises, “pain” and “compelling reason” are more frequently included
- As ASP falls, “authority” and “money” are more frequently included
- Inbound motions are much more likely to include “money” and “timeframe”

# MONTHLY QUOTAS

| Introductory meetings |      |
|-----------------------|------|
| Stage 0 Held          | 16.0 |
| Stage 1 Converted     | 8.2  |

| Semi-qualified opptys |      |
|-----------------------|------|
| Stage 0 Held          | 10.4 |
| Stage 1 Converted     | 6.3  |

| Fully-qualified opptys |     |
|------------------------|-----|
| Stage 0 Held           | 9.0 |
| Stage 1 Converted      | 6.0 |

Average quotas remained rock-steady from 2022 to 2024—this is consistent across ASP, motion, and model.

The global median of Stage 0 Passed is 10 and the global median of Stage 1 Converted is 6. Since 2018, Stage 0 and Stage 1 quotas have fallen 40% and 43% respectively.

# QUOTA ATTAINMENT

On average, 60% of reps in a given group achieve quota.

This metric has been trending down since 2018 and this year's result is the lowest we have reported.

**60% of SDRs achieve quota in a given group.**

# SOURCED PIPELINE PER SDR

The median pipeline generated per SDR rose sharply to \$3.78M. (Note this is raw pipeline, not “forecast” nor “closed won.”) There is wide variation across companies—but 50% of respondents report between \$1.9M and \$6.4M generated per SDR annually.

While the number of Stage 1s Opportunities for the median group didn’t differ significantly between 2022 and 2024 (8.5 versus 7.9), the ASP certainly did (\$27K versus \$44K).

## PART 4

# COMPENSATION

# SDR COMPENSATION

We find median on-target earnings of \$80K and a 68:32 (base:variable) split. This remains unchanged since 2022.

|                    |       |
|--------------------|-------|
| ON-TARGET EARNINGS | \$80K |
| BASE               | \$55K |
| VARIABLE           | \$25K |

Median SDR on-target earnings have grown at just 0.56% CAGR nominally for more than a decade.

# OTE OVER TIME

Over the last 14 years, median SDR OTE has grown 8%—at roughly 0.6% annually. For comparison, US inflation (using CPI) has grown at 43.9% for that same period—or 2.6% annually.

OTE in \$Ks

PART 5

# SALES LEADERSHIP

# FIRST-LINE LEADERSHIP

We asked respondents, “Which best matches the title of the group's first-line leader?”

For companies at/above \$50M in revenue, we find the vast majority of groups are led by *Managers*. *Directors* make up roughly one in seven first-line leaders.

Below \$50M in revenues, we find 1.8X as many *Director* or *VP* first-line leaders.

# REP-TO-LEADER RATIO

The median number of SDRs reporting to a single first-line leader is 6.4. This is down sharply from our 2021-2023 finding of 8 SDRs per leader.

Distribution of reps per front-line leader

Average # of SDRs per front-line leader by revenue

# LEADERSHIP COMPENSATION

*Manager* total compensation has remained relatively flat in real terms since 2018 (posting a compound annual growth rate of just 0.96%).

This is the first time we've noted negative OTE growth for *Directors* and *Vice Presidents*.

|                | 2018   | 2020   | 2022   | 2024   |
|----------------|--------|--------|--------|--------|
| MANAGER        | \$127K | \$128K | \$137K | \$146K |
| DIRECTOR       | \$172K | \$177K | \$193K | \$189K |
| VICE PRESIDENT | \$215K | \$226K | \$243K | \$240K |

# LEADERSHIP COMPENSATION BY ASP

Controlling for company revenues and other factors, front-line leaders' on-target earnings rise as ASP increases.

|                | \$5-25K | \$25-50K     | \$50-100K | \$100-250K | \$250K+      |
|----------------|---------|--------------|-----------|------------|--------------|
| MANAGER        | \$123K  | \$138K       | \$150K    | \$145K     | \$170K       |
| DIRECTOR       | \$135K  | \$183K       | \$188K    | \$210K     | \$221K       |
| VICE PRESIDENT | \$168K  | <sup>1</sup> | \$233K    | \$300K     | <sup>1</sup> |

<sup>1</sup> Too few rows to provide meaningful data

# WHAT WE DO

**Strategy &  
Benchmarking**

**Modern Sales  
Playbooks**

**Tailored Coaching  
& Training**

**Fractional  
Leadership**

**NIMBLE, NOT FORMULAIC.  
REPEATABLE, NOT ASPIRATIONAL.  
PRACTICAL, NOT THEORETICAL.**
